

**Technip Energies and
National Petroleum
Construction Company
Join Forces to Accelerate
Energy Transition**

Headquartered in Abu Dhabi, NT Energies aims to support energy transition in the UAE, the broader Middle East region and North Africa by providing added value services in blue and green hydrogen and related decarbonization projects, and CO₂ capture, in addition to industrial projects in the fields of waste-to-energy, biorefining, and biochemistry. NT Energies is a joint company created by Technip Energies and National Petroleum Construction Company.

Partnership to Access Decarbonization and Circular Economy

NT Energies aims to provide world-class competencies in the areas of decarbonization and circular economy. Our end-to-end services include design, engineering, procurement, fabrication, construction and commissioning of projects in the following sectors:

- Decarbonization: energy efficiency, blue hydrogen, Carbon Capture Utilization and Storage (CCUS)
- Carbon-free energy solutions: green hydrogen, offshore wind, nuclear
- Sustainable chemistry: biofuels, biochemical, circular economy
- Other Energy Transition projects

3 Pillars of collaboration

High level description of the legal and financial structuring envisaged for the deal

Hydrogen and related Decarbonization projects

Large Investment expected around Decarbonization. To collaborate on Technology and Financing as a differentiator

Developing of Additional capability to Assemble Reformers in NPCC Mussafah Yard

CO₂ Recovery and Injection projects

Collaboration on 2 anticipated projects on a Joint venture principle

Additional opportunities for Ateel, Aluminium, Power and Cement plants

Others Industrial projects (Waste-to-Energy projects, Nuclear

Combining Strengths

What NPCC brings:

- Key actor in Middle East strategic development
- Strong presence in Egypt, with NMDC Group as a parent company
- Project management for mega EPC projects
- Fabrication capabilities
- Financial strength
- In-Country Value

What Technip Energies brings:

- Technology and alliances
- Global footprint
- Overall project management capabilities
- Global solution providers from Advisory to EPC/PMC
- History of local presence and execution

Local Execution, Global Experience, Innovation Approach

ABOUT

NPCC

NPCC is the largest MENA-based EPC company that provides total solutions in the energy sector for a clean and decarbonized future.

A leading EPC company in the energy sector, NPCC was established five decades ago to support the UAE's upstream and downstream Oil & Gas operating companies. NPCC's dynamic growth, its past achievements, and modern facilities have transformed the company into a major international EPC contractor, capable of providing the energy industry with complete Engineering, Procurement, Construction and Commissioning services.

NPCC engineering services provide innovative and detailed solutions utilizing the latest and most advanced technology and design software. Its engineering services are provided by a team of over 1,400 engineers. NPCC is a subsidiary of NMDC Group.

TECHNIP ENERGIES

Technip Energies is a leading project delivery, engineering and technology company for energy transition.

The company's mission is to bring groundbreaking projects to life. It has a long history spanning 60 years executing some of the world's largest and most complex projects in onshore and offshore businesses. The Technip Energies team is made up of 15,000 talented professionals, all of whom provide the expertise and technical know-how to develop new solutions that aim to transform the energy industry for a better tomorrow.

The company is driven by a collaborative, inclusive and open spirit.
